

Course Description

This two-day course is a practical application of ACL Analytics, designed for users who want to use ACL Analytics more effectively in real-life situations. By working through a series of progressively challenging case studies, you will develop your critical thinking and application of ACL Analytics.

Continuous Development

16 CPD credits

Target Audience

New users who want to put their basic skills into practice.

Pre-requisites

ACL 101 or 3 months' minimum experience

Training method available

Onsite
