

ACL Certified Training

Summary of Courses

ACL Training: From Acquisition To Expertise

Designed to reflect the needs and backgrounds of auditors of all types, our training will familiarize you with ACL technology for audit content management, data access, trend analysis, and procedure automation, providing you with the appropriate context for deploying the software effectively to meet your organization's objectives.

Introductory-Level Courses

In these hands-on courses, participants learn key ACL concepts and techniques and gather the building blocks necessary to access and analyze data using ACL.

- AX 105 – Introduction to AuditExchange (On-Site Only)
- ACL 105 – Foundations of ACL (General Introductory)
- ACL 111 – Foundations of ACL (Retail Banking)
- ACL 112 – Foundations of ACL (Healthcare Providers)
- AX 153 – Introduction to AuditExchange and Analytics (On-Site Only)
- AX 173 – Introduction to AuditExchange and Analytics (For Experienced Users. On-Site Only)
- ACL 182 – Enterprise Accelerated Course: An Audit Workshop (Offered in Europe Only)

Intermediate-Level Courses

Designed for mid-level ACL users, intermediate courses teach participants how to combine commands and expressions to increase productivity and produce more powerful results.

- ACL 201 – Data Analysis Techniques: An ACL Workshop
- ACL 252 – Using ACL to Detect Fraud
- ACL 260 – Testing Internal Controls
- ACL 291 – Developing Your ACL Procedures: A Custom Workshop (On-Site Only)
- AX 292 – A Custom Workshop for AuditExchange (On-Site Only)

Advanced-Level Courses

Advanced courses are developed for experienced ACL users who want to further refine their skills and increase their knowledge.

- ACL 301 – Advanced ACL Concepts and Techniques: Functions (On-Site Only)
- ACL 302 – Advanced ACL Concepts and Techniques: Scripts (On-Site Only)
- AX 302 – Developing Analytics for AuditExchange (On-Site Only)
- ACL 303 – Advanced ACL Concepts and Techniques: Functions & Scripts

Management

Created specifically to assist managers who are implementing or planning to implement ACL software in their organization.

- ACL 501 – Understanding ACL: A Manager's Perspective (On-Site Only)

Specialized Training

Important for advanced ACL users who want to achieve Certification or pursue ETL training for use with ACL AuditExchange.

- ACL 401 – Informatica PowerCenter 8 Level I Developer
- ACL 901 – ACL Certified Data Analyst (ACDA) Examination

ACL Certified Training

To Register

There are two ways to take ACL Certified Training courses:

Open Enrollment

Open enrollment classes are held in business centers around the world.

To register or view scheduled dates and locations, visit www.acl.com/schedule

On-Site

Bring the course to your organization. On-site classes work best when there are five or more people who require training. For more information, email training@acl.com

For more information about these courses, visit www.acl.com/catalog
